However, it is believed this text alone or any other teaching material for that matter cannot improve student achievement, teacher performance, or quality in civic and ethics studies, but it can be an important stimulus for change and it should give them the ability to interrogate the traditional concepts and effectively intervene in the debates. First, it provides widely agreed guidelines for what students in this nation learn and be able to do in the field of civic and ethics studies. Second, it is hoped to be useful in the development of curricular frameworks, course outlines and professional development programs. Further, the availability of basic civic and moral concepts, as part of the text, is hoped to facilitate similar initiatives by other scholars, teachers and citizens who may want to perform as well as use this material as a platform for further research.
